Investment Strategy	<p>The Scheme is a passively managed exchange traded fund which will follow an investment approach designed to track the performance of Nifty 50 TRI. The Scheme seeks to achieve this goal by investing in securities constituting the Nifty 50 Index in the same proportion as in the Index. The AMC does not make any judgement about the investment merit of the individual security constituting the Nifty 50 Index nor will it attempt to apply any economic, financial or market analysis. Indexing eliminates active management risks with regard to over/ underperformance vis-à-vis a benchmark. This is done by investing in all the stocks comprising the Nifty 50 Index in approximately the same weightage that they represent in Nifty 50 Index. The Scheme will invest at least 95% of its total assets in the securities comprising the Underlying Index. The Scheme may also invest in Money Market Instruments to meet the liquidity and expense requirements.</p>

	<p>The Scheme follows a passive investment strategy. The performance of the Scheme may not be commensurate with the performance of the benchmark of the Scheme on any given day or over any given period. Such variation is commonly referred to as the Tracking Error. The investment strategy revolves around reducing the Tracking Error to the least possible through regular rebalancing of the portfolio, taking into account the change in weights of the securities in the index as well as the incremental Subscriptions/Redemptions from the Scheme.</p> <p>The Scheme intends to use Derivatives for purposes that may be permitted by the SEBI MF Regulations from time to time. Derivatives instruments may take the form of Futures, Options or any other instrument, as may be permitted from time to time. For detailed Derivative strategies, please refer to SAI.</p> <p>Procedure and recording of investment decisions and risk control</p> <p>All investment decisions relating to the Scheme will be undertaken by the AMC in accordance with the Regulations and the investment objectives specified in this Scheme Information Document. All investment decisions taken by the AMC along with justification in relation to the Scheme shall be recorded.</p> <p>The designated fund managers of the Scheme is responsible for taking the day-to-day investment decisions and is <i>inter alia</i> responsible for asset allocation, security selection and timing of investment decisions.</p> <p>The Scheme may invest in other schemes managed by the AMC or in the schemes of any other mutual fund, provided it is in conformity to the investment objectives of the Scheme and in terms of the prevailing Regulations. No investment management fees will be charged for such investments and the aggregate inter-scheme investment made by all schemes of the Mutual Fund or in the schemes under the management of other asset management companies shall not exceed 5% of the Net Asset Value of the Mutual Fund. The limit, however, does not apply to any Fund of Funds scheme.</p> <p><u>PORTFOLIO TURNOVER</u></p> <p>As the Scheme follows a passive investment strategy, the endeavor is to minimize portfolio turnover subject to the exigencies and needs of the Scheme. Generally, as the Scheme is open-ended, turnover is confined to rebalancing of portfolio on account of new Subscriptions, Redemptions and change in the composition of the Nifty 50 Index. Consequently, it is difficult to estimate with any reasonable measure of accuracy, the likely turnover in the portfolio.</p> <p>A higher churning of the portfolio could attract high transactions of the nature of brokerage, custody charges, etc.</p>
Risk Profile of the Scheme	<p>Mutual Fund Units involve investment risks including the possible loss of principal. Scheme specific risk factors are summarized below:</p> <p>Risks associated with the Scheme being an Exchange Traded Fund (“ETF”) :</p> <p>a) <u>Absence of prior active market</u>: Although the Units of the Scheme will be listed on</p>

	<p>the Stock Exchange for trading, there can be no assurance that an active secondary market will develop or be maintained.</p> <p>b) <u>Lack of market liquidity</u>: Trading in Units of the Scheme on the Stock Exchange on which it is listed may be halted because of market conditions or for reasons that, in the view of the concerned Stock Exchange or market regulator, trading in the ETF Units is inadvisable. In addition, trading in the Units of the Scheme may be subject to trading halts caused by extraordinary market volatility pursuant to 'circuit breaker' rules. There can be no assurance that the requirements of the concerned Stock Exchange necessary to maintain the listing of the Units of the Scheme will continue to be met or will remain unchanged.</p> <p>c) <u>Units of the Scheme may trade at prices other than NAV</u>: Units of the Scheme may trade above or below its NAV. The NAV of the Scheme may fluctuate with changes in the market value of a Scheme's holdings. The trading prices of Units of the Scheme will fluctuate in accordance with changes in its NAVs as well as market supply and demand. However, given that the Scheme can be created / redeemed in Creation Units, directly with the Fund, large discounts or premiums to the NAVs will not sustain due to arbitrage possibility available.</p> <p>d) <u>Regulatory Risk</u>: Any changes in trading regulations by the Stock Exchange or SEBI may affect the ability of the Market Maker to arbitrage resulting into wider premium/discount to NAV. Although the Scheme is proposed to be listed on the Exchange, the AMC and the Trustee will not be liable for delay in listing of Units of the Scheme on Exchange / or due to connectivity problems with the Depositories due to the occurrence of any event beyond their control.</p> <p>e) <u>Right to limit Redemption</u>: The Trustee, in the general interest of the Unitholders of the Scheme offered under this SID and keeping in view of the unforeseen circumstances/unusual market conditions, may limit the total number of Units which can be redeemed on any Business Day depending on the total "Saleable Underlying Stock" available with the Fund.</p> <p>f) <u>Redemption Risk</u>: The Unitholders may note that even though this is an open ended scheme, the Scheme would ordinarily repurchase Units in Creation Unit Size. Thus, Unit holdings less than the Creation Unit Size can normally only be sold through the secondary market unless no quotes are available on the Exchange for 3 trading days consecutively.</p> <p>g) Though the Scheme will be listed on the stock exchange, there is no assurance that an active secondary market will develop or be maintained.</p> <p>h) Investors may note that even though this is an open-ended scheme, they will have to buy or sell Units of the Scheme on the Stock Exchanges where these Units are listed for liquidity at the market price, subject to the rules and regulations of the Exchange. Buying and selling units on the Stock Exchange requires the investor to engage the services of a broker and are subject to payment of margins as required by the Stock Exchange/broker, payment of brokerage, securities transactions tax and such other costs.</p> <p>i) The market price of the Units of the Scheme, like any other listed security, is largely dependent on two factors, viz. (1) the intrinsic value of the Unit (or NAV) and (2) demand and supply of Units in the market. Sizeable demand or supply of the Units on the Stock Exchange may lead to market price of the Units to quote at premium or discount to NAV. However, since the eligible investors can transact with the AMC for</p>
--	--

	<p>Units in the Creation Unit Size, there should not be a significant variance from the NAV. Hence, the price of the Scheme is less likely to hold significant variance (large premium or discount) from the latest declared NAV all the time.</p> <p>j) The Units will be issued only in demat form through Depositories. The records of the Depository are final with respect to the number of Units available to the credit of Unit holder. Settlement of trades, repurchase of Units by the Mutual Fund depends on the confirmations to be received from Depository(ies) on which the AMC has no control.</p> <p>Risks associated with investing in securities constituting Nifty 50 index :</p> <p>The Scheme attempts to track its benchmark index and would invest in the securities constituting the index regardless of their investment merit. As such, the Scheme is exposed to certain specific risks relating to the index as given below :</p> <ul style="list-style-type: none"> • Performance of the Underlying Index (viz. Nifty 50 Index) will have a direct bearing on the performance of the Scheme. In the event when the Underlying Index is dissolved or is withdrawn by NSE Indices Limited (NSEIL) or is not published due to any reason whatsoever, the Trustee reserves the right to modify the Scheme so as to track a different and suitable index and appropriate intimation will be sent to the Unitholders of the Scheme. In such a case, the investment pattern of the Scheme will be modified suitably to match the composition of the securities that are included in the new index to be tracked and the Scheme will be subject to Tracking Errors during the intervening period, subject to applicable SEBI MF Regulations. • Tracking Errors are inherent in any index based fund and such errors may cause the Scheme to generate returns which are not in line with the performance of the Underlying Index or one or more securities covered by / included in the Underlying Index. Such errors may arise from a variety of factors including but not limited to, any delay in the purchase or sale of securities due to illiquidity in the market, settlement and realisation of sales proceeds, delay in credit of securities or in receipt and consequent reinvestment of Dividends, etc. Under normal circumstances, such Tracking Error is not expected to exceed 2% per annum. It needs to be clearly understood that the actual Tracking Error can be higher or lower. • The Underlying Index reflects the prices of securities at a point in time, which is the price at close of Business Day on the National Stock Exchange of India Limited (NSE). The Scheme, however, may trade in these securities at different points in time during the trading session and therefore the prices at which the Scheme trades may not be identical to the closing price of each scrip on that day on the NSE. In addition, the Scheme may opt to trade the same securities on different exchanges due to price or liquidity factors, which may also result in traded prices being at variance, from NSE closing prices. • NSEIL undertakes periodic reviews of the securities that are represented in the Nifty 50 Index and from time to time may exclude existing securities or include new ones. In such an event, the Scheme will endeavor to reallocate its portfolio to mirror the changes. However, the reallocation process may not occur instantaneously and permit precise mirroring of the Nifty 50 Index during this period. • Being an open-ended scheme, the Scheme may hold appropriate levels of cash or Cash Equivalents to meet ongoing Redemptions. The Scheme may not be able to acquire or sell the desired number of securities due to conditions prevailing in the securities

	<p>market, such as, but not restricted to: circuit filters in the securities, liquidity and volatility in security prices.</p> <ul style="list-style-type: none"> • In case of investments in Derivatives, the risk reward would be the same as investments in portfolio of shares representing an index. However, there may be a cost attached to buying future. Further, there could be an element of settlement risk, which could be different from the risk in settling physical shares and there is a risk attached to the liquidity and the depth of the index futures market as it is relatively new market. • Currency Risk: Companies within the index may have exposure to foreign currencies through international sales, imports, or foreign exchange contracts. Currency fluctuations can impact the earnings and cash flows of these companies, affecting the performance of the Scheme. • Regulatory and Environmental Risk: Companies within the index may be subjected to regulatory requirements related to environmental protection, safety standards, labor practices, and land acquisition. Changes in regulations or compliance issues can affect production costs, supply chains, and profitability, impacting the Scheme's performance. • Technological Disruption: Advances in technology, such as automation, robotics, and renewable energy, can disrupt supply chains, affecting the competitiveness and profitability of the companies held in the index which will have a direct bearing on the performance of the Scheme. • Corporate Governance Risks: Weak corporate governance practices, such as inadequate board oversight, conflicts of interest, or related-party transactions, can undermine shareholder value and increase the risk of fraud, mismanagement, or regulatory scrutiny, affecting the Scheme's returns. • Investments in the equity shares of the companies constituting the Underlying Index are subject to price fluctuation on daily basis. The volatility in the value of equity is due to various micro and macro-economic factors like economic and political developments, changes in interest rates, etc. affecting the securities markets. This may have adverse impact on individual securities/sector and consequently on the NAV of Scheme. • Dividends from the constituent securities are assumed to be reinvested into the Nifty 50 Index after the ex-dividend date of the constituents. However, in practice, the dividend is received with a lag. This can lead to some Tracking Error. • The Scheme may not be able to sell securities in the market due to various reasons, which can lead to temporary illiquidity. <p>Investments in the Scheme are subject to various risk factors, including but not limited to risks associated with :</p> <ul style="list-style-type: none"> ✓ Tracking Error and Tracking Difference ✓ Investing in equities and equity related securities ✓ Passive investments ✓ Settlement Risk ✓ Portfolio Concentration Risk ✓ Volatility Risk ✓ Right to limit Redemptions ✓ Investing in Money Market Instruments ✓ Portfolio rebalancing
